

## GOGO Media Player ActiveX Control v2.30 - Development::Active X Software

GOGO Media Player ActiveX Control helps application developers to fully control the audio and video stream. Play, pause, resume, stop, loop the stream. It allows you to control the playback rate and adjust the volume and balance, or mute the audio stream. It supports MIDI, MP3, WAV, WMA audio file formats, and support ASF, AVI, DIVX, MOV, MPEG-1, MPEG-2, MPEG-4, RM, RMVB, DAT, VOB, WMV, XVID video file formats. You can get the current position of the stream in second or in HH:MM:SS format. Useful functions help user to create playback slider easily. Moreover, you can get useful information such as video height and width, bit rate and the duration. Capture current image from the media. The bitmap format allows .bmp, .gif, .jpg, .png, and .tif. Set Media Position.
